## **Carnisol®** a natural L-Carnitine supplement with L-Carnipure®

Cardiovascular sports. Training. Outdoor fitness. Whether you're a full time adrenaline junkie, a weekend warrior, or just thinking about how to lose the extra jiggle, spending a few hours out there can really wear you out. Your body often lacks sufficient levels of L-Carnitine, a natural compound which is produced in the body and helps maintain healthy energy levels. Clinical trials indicate that taking L-Carnitine regularly prior to exercise promotes increased energy and endurance—without accelerating heart rate—while you're doing whatever you need to do to stay active.\* Carnisol® also promotes efficient post-exercise recovery, supports healthy cardiovascular function, and facilitates fat breakdown—without a loss of lean muscle tissue.\* Carnisol® with L-Carnipure® is the only L-Carnitine available in a soft gel.
