

# Healthy vibrant skin at any age

## From the inside out.

### Injuv®

An all-natural total skin solution in a soft gel for superior internal absorption

Injuv® contains natural Hyaluronic Acid (HA), essential to maintaining fluid balance within cells. HA is naturally occurring in the body (skin, cartilage, joints, and connective tissue) but declines with age in most individuals, and must be replenished from outside sources. While the initial molecules of HA are too large to be absorbed in the body orally, a patented process unique to Injuv® provides a safe, natural, low molecular weight HA to hydrate the skin's cellular matrix from the inside out.\* By strengthening the skin's internal structure, Injuv® promotes a firm, plump tone to skin.\* Studies have shown that HA may also aid in wound healing, while diminishing the severity of scars and breakouts.\* HA also supports joint health and is a key building block of joint tissue.\* Injuv® in a soft gel maximizes internal absorption and supplements the body's HA content in a manner that external cosmetic creams and lotions cannot duplicate.\*
